DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 32-33 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 32-33 drawn to non-functional descriptive material. MPEP 2106.IV.B.1(a) (Nonfunctional Descriptive Material) states:

Descriptive material that cannot exhibit any functional interrelationship with the way in which computing processes are performed does not constitute a statutory process, machine, manufacture or composition of matter and should be rejected under 35 U.S.C. 101.

Where certain types of descriptive material, such as music, art, photographs and mere arrangements or compilations of facts or data, are merely stored so as to be read or outputted by a computer without creating any functional interrelationship, either as part of the stored data or as part of the computing process performed by the computer, then such descriptive material alone does not impart functionality either to the data as so structured, or to the computer.

For example, music is commonly sold to consumers in the form of a compact disc. In such cases, the known compact disc acts as nothing more than a carrier for nonfunctional descriptive material. The purely nonfunctional descriptive

material cannot alone provide the practical application for the manufacture.

MPEP 2106.IV.B.1 (Nonstatutory Subject Matter) states:

When nonfunctional descriptive material is recorded on some computer-readable medium, it is not statutory since no requisite functionality is present to satisfy the practical application requirement.

Claims 32-33 currently recite(s) an image print. There is no functional relationship imparted by this data to a computing device. Therefore, the claim is drawn to non-functional descriptive material which is non-statutory per se. The fact that the claim recites a computer readable medium does not provide the utility (i.e., practical application in the technological arts) required under 35 U.S.C. 101 for the manufacture.

Response to Arguments

3. Applicant's arguments in the Response filed 1/16/07 (page 8, lines 9-16) with respect to the rejection of claims 30-33 under 35 USC §112 have been fully considered and are persuasive. The rejection of claims 30-33 under 35 USC §112 has been withdrawn.

4. Applicant's arguments in the Response filed 1/16/07 (page 8, lines 17-26) with respect to the rejection of claims 32-33

Art Unit: 2625

under 35 USC §101 have been fully considered but they are not persuasive.

Applicant argues (1/17/07 Response: page 8, lines 17-26) that a "print" comprising an image formed of a colorant on a medium, and is thus a tangible medium which is a manufacture or composition of matter, statutory under 35 USC §101.

However, as noted above, MPEP 2106.IV.B.1(a) (Nonfunctional Descriptive Material) states:

Descriptive material that cannot exhibit any functional interrelationship with the way in which computing processes are performed does not constitute a statutory process, machine, manufacture or composition of matter and should be rejected under 35 U.S.C. 101.

Where certain types of descriptive material, such as music, art, photographs and mere arrangements or compilations of facts or data, are merely stored so as to be read or outputted by a computer without creating any functional interrelationship, either as part of the stored data or as part of the computing process performed by the computer, then such descriptive material alone does not impart functionality either to the data as so structured, or to the computer.

For example, music is commonly sold to consumers in the form of a compact disc. In such cases, the known compact disc acts as nothing more than a carrier for nonfunctional descriptive material. The purely nonfunctional descriptive

material cannot alone provide the practical application for the manufacture.

Allowable Subject Matter

5. Claims 1-10, 12-15, 23-26, 28-31, & 35-37 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter:

As noted previously, Applicant's arguments in the Response filed 8/7/06 (page 8, line 7 - page 9, line 6) have been fully considered and are persuasive.
